The Real Value Meal

Organic food is better for you, the planet and – contrary to popular opinion – even your wallet. Here, we explain why

I have to admit I used to be a sceptic about organic food. Recently I had a change of heart. First I read Mark Baskin's *Organic Revolution* (the *Organic Food for Your Planet* book) and then I read *The New Rules of Happiness* by Michael Pollan. Both books convinced me that organic food is not just a fad, but a way of life. It's a way of life that is better for you, the planet and – contrary to popular opinion – even your wallet. Here, we explain why

ORGANIC Many people worry about the safety of organic food. But it's not just about safety. It's about the way the food is produced. Organic food is produced without the use of synthetic pesticides, herbicides, and fertilizers. This means that organic food is better for you, the planet, and your wallet.

your best life starts here!

The latest research in positive psychology is showing that the most important factor in happiness is not money, but the way we live. It's about the way we live that makes the difference. It's about the way we live that makes the difference.

THE NEW RULES OF HAPPINESS There are plenty of ways to live a happy life. But the most important factor in happiness is not money, but the way we live. It's about the way we live that makes the difference. It's about the way we live that makes the difference.
